Complete the function $solveMeFirst$ to compute the sum of two integers.

Example

$a = 7$

$b = 3$

Return 10.

Function Description

Complete the $solveMeFirst$ function with the following parameters:

- $int\ a$: the first value
- $int\ b$: the second value

Returns

- int: the sum of a and b

Constraints

$1 \leq a, b \leq 1000$

Sample Input

```
a = 2
b = 3
```

Sample Output

```
5
```

Explanation

$2 + 3 = 5$.

Alice and Bob each created one problem for HackerRank. A reviewer rates the two challenges, awarding points on a scale from 1 to 100 for three categories: probl
originality, and difficulty.

The rating for Alice's challenge is the triplet a = (a[0], a[1], a[2]), and the rating for Bob's challenge is the triplet b = (b[0], b[1], b[2]).

The task is to calculate their comparison points by comparing each category:

- If a[i] > b[i], then Alice is awarded 1 point.
- If a[i] < b[i], then Bob is awarded 1 point.
- If a[i] = b[i], then neither person receives a point.

Example

a = [1, 2, 3]

b = [3, 2, 1]

- For elements "0", Bob is awarded a point because a[0] < b[0].
- For the equal elements a[1] and b[1], no points are earned.
- Finally, for elements 2, a[2] > b[2] so Alice receives a point.

The return array is [1, 1] with Alice's score first and Bob's second.

Function Description

Complete the function compareTriplets with the following parameter(s):

- int a[3]: Alice's challenge rating
- int b[3]: Bob's challenge rating

Returns

- int[2]: the first element is Alice's score and the second is Bob's score

Input Format

The first line contains 3 space-separated integers, a[0], a[1], and a[2], the respective values in triplet a.

The second line contains 3 space-separated integers, b[0], b[1], and b[2], the respective values in triplet b.

Constraints

- 1 ≤ a[i] ≤ 100
- 1 ≤ b[i] ≤ 100

Sample Input 0

```
5 6 7
3 6 10
```

Sample Output 0

```python
def compareTriplets(a, b):
    alice = 0
    bob = 0

    for i in range(3):
        if a[i] > b[i]:
            alice += 1
        elif a[i] < b[i]:
            bob += 1

    return [alice, bob]

if __name__ == '__main__':
    a = list(map(int, input().split()))
    b = list(map(int, input().split()))

    result = compareTriplets(a, b)
    print(result[0], result[1])
```

You have earned 10.00 points!

You are now 9 points away from the 1st star for your problem solving badge.

In this challenge, you need to calculate and print the sum of elements in an array, considering that some integers

Function Description

Complete the $aVeryBigSum$ function with the following parameter(s):

- $int\ ar[n]$: an array of integers

Return

- $long$: the sum of the array elements

Input Format

The first line of the input consists of an integer n.

The next line contains n space-separated integers contained in the array.

Output Format

Return the integer sum of the elements in the array.

Constraints

$1 \leq n \leq 10$

$0 \leq ar[i] \leq 10^{10}$

Sample Input

```
STDIN                                        Function
-----                                        --------
5                                           arr[] size n = 5
1000000001 1000000002 1000000003 1000000004 1000000005  arr[...]
```

Output

```
5000000015
```

Note:

The range of the 32-bit integer is $(-2^{31})\ to\ (2^{31}-1)\ or\ [-2147483648, 2147483647]$.

Change Theme Language Python 3

```python
def aVeryBigSum(arr):
    return sum(arr)

if __name__ == '__main__':
    n = int(input().strip())
    arr = list(map(int, input().split()))
    result = aVeryBigSum(arr)
    print(result)
```

Digital Literacy Awareness Quiz

This quiz tests basic knowledge of digital literacy.

What is Digital Literacy?

Multiple choice

- Ability to use digital tools effectively
- Only using social media
- Playing games online
- Watching videos
- Add option or add "Other"

Required

Question:
Name one digital tool you use for studying. *

Short answer text

Questions Responses Settings

Which of the following is a safe internet practice? *

- Sharing passwords
- Clicking unknown links
- Using strong passwords
- Posting personal info

What should you include in a professional email?

- Slang language
- Clear subject line
- Emojis only
- No greeting

Which platform is used for professional networking? *

- Instagram
- WhatsApp
- LinkedIn
- Snapchat
